## Stay Tuned For The New Edition Of The European Researchers Night 2022 - SEARCH

After a one-year break, the next edition of The European Researchers Night 2022 Project will take place on **September 30, 2022** with presentations, demonstrations, lectures and meetings with hundreds of scientists from all over the country. Experts will introduce you to news from their research fields. They will comment on current news from the world of science and technology and explain to you the role of science in everyday life and its part in the development of humanity and share with you why they chose the field of science.

During The European Researchers Night 2022, you can participate in various activities organized by educational institutions and organizations from **over 30 settlements in Bulgaria**. You can join the Night from anywhere in the world in real time online.

The code name of the innovative project, in which more than 300 cities in Europe and the world participate in, is **SEARCH - Science+Environment+Art=Resilience**.

*The initiative to promote science and its achievements is funded by Horizon Europe 2021 - 2027 of the European Union.*

The focus of the European Researchers Night's events this year is glass, the most versatile material in human history with an essential role in society for technological, scientific and economic progress, as well as climate change and the related urgent and essential choices humanity must make. Both highlights are in the context of the International Year of Glass 2022, announced by the United Nations and global European programs and priorities.

The European Researchers Night Project - SEARCH is an ambitious effort that aims to help promote science, scientific activity, and the scientific profession to a wide audience, with an emphasis on adolescents. SEARCH aims to encourage more Bulgarians, especially students, to work with the possibility of a career in the field of scientific research.

This year, **15 main and 16 associate partners** from all over the country are participating in the Night and have prepared a special program of events that will last several months. The program covers exciting activities in schools, competitions, meetings with scientists in research institutes and universities, as well as events in public city places, in museums, laboratories and other educational institutions.

We are inviting you again this year at the European Researchers Night SEARCH 2022 with interesting, fun, cheerful and educational demonstrations, experiments, games, lectures and other activities to
